There are many reasons why a cookie could not be set correctly. Below are the most common reasons:

- You have cookies disabled in your browser. You need to reset your browser to accept cookies or to ask you if you want to accept cookies.
- Your browser asks you whether you want to accept cookies and you declined. To accept cookies from this site, use the Back button and accept the cookie.
- Your browser does not support cookies. Try a different browser if you suspect this.
- The date on your computer is in the past. If your computer’s clock shows a date before 1 Jan 1970, the browser will automatically forget the cookie. To fix this, set the correct time and date on your computer.
- You have installed an application that monitors or blocks cookies from being set. You must disable the application while logging in or check with your system administrator.

Why Does this Site Require Cookies?

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

What Gets Stored in a Cookie?

This site stores nothing other than an automatically generated session ID in the cookie; no other information is captured.

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

While the alpha version of the EAD DTD and support documentation was being finalized, the Library of Congress Network Development and MARC Standards Office formally agreed to serve as the maintenance agency for the EAD in a letter to Susan Fox, executive director of SAA. As the maintenance agency, the Library would make the DTD and support documentation available and act as a clearinghouse for communications on EAD, chiefly through the establishment of a listserv and World Wide Web site. SAA would be responsible for ongoing oversight of the standard. The files remained stable to permit implementation and full testing by EAD Working Group members and participating institutions. Beta Workshops, Orientation Sessions, and Outreach Efforts. The Library of Congress > Librarians, Archivists > Finding Aids > EAD Best Practices. Finding Aids. EAD Best Practices at LC. Related Resources. Search Finding Aids. These best practices supplement the EAD 2002 Schema, the EAD DTD Version 2002, and the EAD Tag Library, published by the Society of American Archivists (SAA) and the Library of Congress (LC). They conform with the RLG Best Practice Guidelines for Encoded Archival Description [PDF / 428K] and the EAD Application Guidelines (Version 1.0). Table of Contents. EAD Best Practices at the Library of Congress contains the following sections
