We must build the Silk Road Economic Belt and the 21st Century Maritime Silk Road, creating a new regional economic order. Xi clearly sees China’s considerable economic resources as a key tool in his efforts to maintain regional stability and assert China’s leadership in the country’s neighborhood. Analysts regard the work conference as a significant turning point in the evolution of China’s foreign policy. Many analysts tend to overstate geostrategic dimensions of the project, while underappreciating the economic agenda of OBOR. The two goals are not contradictory. China is using OBOR to assert its regional leadership through a vast program of economic integration. You are here. Home » 21st-Century Geopolitics Of Central America: Grand Strategy. Geopolitics. In spite of the formidable challenge that this presents to the emerging Multipolar World Order, there’s still a chance that the Western Hemisphere won’t fall back under the US’ full control even if Washington is successful in overthrowing the Venezuelan government, and this is due to China’s silently growing influence in Latin America and its ambitious plans to build a. China is well aware of the geographic limitations forever hindering the projection of its influence in Central America, which is. Should this happen, then the ultimate geostrategic redoubt of “Fortress America” would look quite different than what
